Present:

January 20, 2017

Hexavalent Chromium

What is it, what do I need to know about it and what do I need to do to protect workers and be in compliance with OSHA regulation?

Brenda Finter, CIH, CSP, will present OSHA requirements and more on Hexavalent Chromium, a not so uncommon exposure for welders and others occupations.

Brenda Finter is a consultant with B2 Environmental. B2E has offices in Omaha & Grand Isle, Nebraska, Los Angeles & Benicia California, Dallas, Texas and Salt Lake City, Utah. B2E specializes in Industrial Hygiene applications such as asbestos, lead, mold, IAQ, worker exposure monitoring, environmental compliance audits, and Environmental Science applications such as Phase I and Phase II

environmental site assessments, tank closures, hazardous materials management, and wetland services. She has more than 30 years of expertise in industrial hygiene, indoor air quality, safety, and environmental health in manufacturing, military hospitals and installations, and consulting. She is a US Army veteran and received much of her IH training in the military. Her responsibilities also include serving as the corporate safety officer and radiation safety officer.
